Garage Management Software

---

1. Project Overview

Garage Management Software helps garage owners manage daily workshop operations, from customer registration and vehicle servicing to billing, payment collection, and service reminders.

It also manages spare parts inventory and vendors. Stock automatically decreases when parts are used or sold and increases when you receive new parts.

The software supports GST billing, UPI payments, and optional WhatsApp communication, keeping everything in one place.

2. Complete Workshop Process

Appointment (Optional) → Customer & Vehicle → Service Order → Digital Inspection → Estimate & Approval → Workshop Board → Inventory / Vendors (If Needed) → Billing & Payment → Vehicle Delivery → Reminders → Reports

---

3. Core Software Modules

1. Customer & Vehicle Module

Keeps customer and vehicle information in one place.

- Lead Management (CRM)
- Customer details (name, phone, address)
- Vehicle details (registration number, make/model)
- Complete service history
- Customer communication history
- Vehicle documents and expiry reminders

2. Service Order Module

Creates and manages a Service Order for each vehicle visit.

- Create and manage Service Orders

- Record customer complaints and required services
- Generate a vehicle check-in receipt (optional)
- Connect inspection, parts, billing, and payments
- Assign service jobs to technicians
- Schedule jobs and track expected completion
- Voice-Based Service Notes (optional)

3. Digital Vehicle Inspection (DVI) Module

Helps garages inspect vehicles and maintain records of identified issues.

- Vehicle inspection checklist
- Photos and videos of issues
- Suggested repairs, spare parts, and labour

4. Estimate & Approval Module

Prepares service estimates and records customer approval before repairs begin.

- Create estimates (labour + parts + GST)
- Share estimates through WhatsApp (optional)
- Record approval method (manual, phone, WhatsApp or online)
- Support full, partial, or rejected estimates
- Maintain customer approval history
- Create revised estimates for additional repairs

Note: WhatsApp approval is optional. Garage staff can obtain approval directly from the customer (in person or by phone) and manually mark the estimate as approved or rejected.

5. Workshop Board Module

Provides a live overview of vehicles currently in the workshop.

- View all active Service Orders
- Track repair progress
- Track available and occupied vehicle repair spaces
- Statuses: Waiting, Inspection, In Progress, Waiting for Parts, Ready, Completed
- Technician-wise job view, workload, priorities, and deadlines

6. Inventory & Spare Parts Module

Manages spare parts inventory and stock quantities.

- Live stock availability
- Low-stock alerts

- Reserve parts for specific Service Orders
- Create parts requests for unavailable stock
- Track stock transfers and adjustments
- Batch and serial-number tracking (where applicable)
- Barcode scanning for spare parts (optional)
- Sell spare parts directly to customers without creating a Service Order.

7. Vendor & Purchase Module

Manages suppliers and spare parts purchases.

- Vendor information
- Convert parts requests into Purchase Orders
- Vendor bills and outstanding payments
- Track pending and partially received purchases
- Purchase returns to vendors
- Receive purchased spare parts and automatically update inventory

8. Billing & Payment Module

Creates GST invoices, manages customer payments, and tracks workshop financial transactions.

- Track customer and vendor payments, advances, and pending balances
- GST invoices (Create, Download, Print & Share)
- UPI QR code/payment links
- Cash, UPI, Card, and mixed payments
- Partial payments and pending payment tracking
- Discounts, refunds, and credit notes
- Payment receipts and transaction history
- Daily expense tracking
- Cash register, petty cash & daily cash closing
- Profit tracking for Service Orders

9. Reminder & Notification Module

Helps garages manage service reminders and payment follow-ups.

- Service, appointment, and vehicle document expiry reminders
- Optional WhatsApp / SMS notifications
- Pending payment reminders
- Manual reminder management
- Promotional offers, Loyalty Rewards, and customer follow-ups

10. Reports & Dashboard Module

Provides an overview of daily workshop and business performance.

- Daily, weekly, and monthly sales
- Service Order and overall business profit reports
- Stock movement reports
- Vendor outstanding payments
- Customer pending payments
- Technician performance reports
- Service Order profitability reports
- Average vehicle service completion time

11. Settings & Administration Module

Controls garage information and software settings.

- Garage details and GST settings
- Labour charges and service packages
- Invoice design
- WhatsApp / SMS settings (optional)
- Workshop working hours and holidays
- Multiple garage locations (optional)
- Import existing customer, vehicle, and spare parts records from Excel / CSV.
- Multi-language support (English, Hindi, Gujarati, and other regional languages)

12: Team Management

Manages garage employees, technicians, their work activities, attendance, and performance.

Key Features:

- Employee and technician profiles
- Roles and permissions (Owner, Manager, Technician, Accountant)
- Employee attendance, shifts, and leave management
- Job time tracking and timesheets
- Employee salary and payment records
- Technician productivity and performance tracking
- Staff activity logs and audit history

13. Appointment & Booking Management

Manages customer service appointments and workshop schedules.

- Create and manage service appointments
- Calendar view of upcoming bookings
- Manual and online booking (optional)

- Assign appointment dates and time slots
- Reschedule or cancel appointments
- Track available workshop slots

Module 14: Vehicle AMC Management (Optional)

- Create and manage annual maintenance packages
- Track package validity and remaining services

Additional Features That Can Make Our Software Stand Out

1. Before & After Repair Photos (Optional)

Allow mechanics to upload photos of old and replaced parts as proof of completed repairs. These photos can be shared with customers along with their invoices.

Note: This may increase the mechanic's workload, so the feature should remain optional.

2. Daily Owner Summary

Provide a simple daily summary showing vehicles serviced, total payments received, expenses, pending payments, and unfinished work.

3. Repeat Problem Tracking

Identify when a customer returns with the same vehicle problem and link it to previous service records. This helps garages track repeated issues and improve service quality.

4. Service Warranty Tracking

Track repair and spare part warranties to help manage repeated problems and customer complaints.

5. Smart Document Scanning & Automatic Data Entry

- **Job Cards:** Upload or scan a photo of a handwritten job card to automatically create a digital Service Order.

- **Vendor Purchases:** Upload photos of vendor bills directly from the vendor's profile to automatically extract and fill purchase details, update records, and store the original bills.

5. Competitor Feature Comparison

This comparison shows the features planned for our Garage Management Software alongside five competitors we researched.

Competitors: GarageBox, OKMechanic, GarageSaarthi, GaragePlug, and Autorox.

Legend:

- ✓ — Feature included in our plan or advertised by the competitor
- ◐ — Feature mentioned by the competitor, but its exact functionality is not publicly explained or demonstrated
- — Feature not confirmed from public information

6. Additional Platforms Discovered During Research

During our research, we also came across a few other garage and service management platforms worth noting for future reference.

- **Shopmonkey** — Auto repair management software offering service orders, inspections, estimates, inventory, payments, and customer communication. https://www.shopmonkey.io/
- **ServiceBay** — Service management software offering job tracking, scheduling, estimates, invoicing, and payments. https://servicebay.io/
- **TTN Garage (Low-Cost Competitor)** — Offers similar garage management services at a very affordable price, with its Basic Plan starting at ₹999/year. https://tightthenut.com/
